Role: Senior Software Development Manager

Location: Pune

PROFESSIONAL SUMMARY

Senior Engineering and Delivery Manager with 20+ years of experience leading enterprise transformation across banking, financial services, healthcare, telecom, retail, and product engineering. Proven record in managing multi-million-dollar portfolios, scaling distributed teams, and driving Agile, DevSecOps, cloud modernization, and GenAI-enabled delivery, with strengths in portfolio governance, operational excellence, executive stakeholder engagement, and responsible AI adoption.

CORE SKILLS

Tech Stack:	Java, Web Services, Spring Boot, Microservices, .NET, MERN, Ansible Playbooks, AWS, WebSphere, OpenShift / Docker-ECS, SQL
Databases:	Oracle, SQL Server, PL/SQL
Development Tools:	Eclipse, JDeveloper, VS Code
ALM / Delivery Tools:	Jira, MS Project, ADO Boards, NetSuite, Oracle HCM, Jenkins, TeamCity
People Management:	Engineering Leadership, Talent Development, Hiring, Mentoring, Performance Reviews
Delivery & Program Management:	Agile Delivery, Enterprise Program Delivery, Portfolio Governance, Stakeholder Management, Client Management, Delivery Predictability
DevOps:	Cloud Modernization, Microservices Architecture, DevOps Transformation, CI/CD Automation, Platform Modernization
Governance, Risk & Compliance:	Security Remediation, Vulnerability Assessment, BlackDuck, Imperva RASP, Contrast, Checkmarx, Rapid7, Sonar, AppDynamics
AI Tools:	GitHub Copilot, Codex, Cursor, Antigravity, Claude, ChatGPT, Ollama
AI / Gen AI Enablement:	AI-Assisted Delivery, Prompt-Based Documentation, Code Review Assistance, Delivery Automation

DOMAIN SKILLS

- Banking, financial services, treasury, liquidity management, cash management, and trade-related platforms
- Healthcare and life sciences, including patient onboarding, reimbursement workflows, and engagement lifecycle management
- Retail, HCM, telecom automation, product engineering, DevSecOps, cloud modernization, and enterprise delivery governance

PROFESSIONAL EXPERIENCE

Organization	Designation	Tenure
Brillio Technologies	Senior Software Development Manager	September 2021 – Present
Citicorp Technology Services	AVP - DevOps, NPS, Development Lead	May 2015 – September 2021

Synechron Technologies	Lead Software / Technical Lead	May 2011 – April 2015
Opus Software Solutions	Lead Development / Technical Lead	July 2008 – May 2011
SunGard Technology Services	Software Engineer	July 2006 – July 2008

PROJECT EXPERIENCE

At Brillio, I lead multi-account delivery across healthcare, HCM, retail, and telecom, owning Agile governance, client engagement, resourcing, delivery predictability, and margin management.

1. Account: Sun Pharma – Digital Brand Websites Program

Duration: Ongoing | **Team Size:** 14 | **Client:** Sun Pharmaceutical Industries Ltd.

Description: Digital delivery program covering ongoing website delivery, governance, support, and enhancement initiatives across 27 brand websites. Includes AEM-based development, content updates, production support, stakeholder coordination, incident management, estimation governance, SOP improvements, and delivery excellence across brand, agency, Adobe, and infrastructure/vendor teams.

Technologies Used: AEM Cloud, AEM Sites, Jira, GitHub Copilot Enterprise, HTML, CSS, JavaScript, Adobe ecosystem, GoDaddy / Brandsight domain management, SharePoint, Excel Reporting

Job Responsibilities:

- Own end-to-end delivery governance for Sun Pharma's 27-brand website portfolio.
- Lead a 14-member team across development, QA, production support, content operations, and release coordination.
- Act as Program Manager and primary delivery interface across Sun Pharma, brand teams, agencies, Adobe, domain partners, and Brillio teams.
- Drive planning, estimation reviews, scope alignment, prioritization, delivery tracking, risk management, and stakeholder reporting.
- Lead incident response, war-room coordination, RCA documentation, escalation governance, and production readiness practices.
- Strengthen SOPs, estimate guardrails, operational readiness, AI-assisted delivery adoption, and proactive website health monitoring recommendations

2. Account: CareMetx – Connect and Resilix

Duration: Ongoing | **Team Size:** 25+ | **Client:** Regeneron, Novartis

Description: Healthcare platform supporting patient onboarding, adherence, reimbursement workflows, and engagement lifecycle management for pharma clients.

Technologies Used: Jira, .NET, MERN

Job Responsibilities:

- Own delivery governance across multiple Agile pods.
- Drive sprint planning, prioritization, risk management, and stakeholder communication.
- Lead hiring, resource planning, performance reviews, and delivery tracking.
- Improve predictability through Agile reporting and proactive issue management.

3. Account: Dayforce Tax Automation Program

Duration: 8 months | **Team Size:** 24 | **Client:** Dayforce

Description: Delivered 3 WPA and 1 RPA automation use cases across HCM, streamlining HR workflows and improving efficiency and user experience.

Technologies Used: Excel, ADO Boards, NetSuite

Job Responsibilities:

- Owned planning, milestones, client communication, and governance for the automation program.

-
- Led cross-functional teams and managed resource allocation for skills, tooling, and capacity readiness.
 - Managed delivery risks, budgets, quality standards, and direct margin above 45% for the account.
 - Aligned teams, clients, and vendors on goals, dependencies, and improvement opportunities.
-

4. Account: Albertsons Companies (Developer Portal)

Duration: 8 months | **Team Size:** 30 | **Client:** Albertsons Companies

Description: Developer Portal and PCF migration initiatives supporting internal self-service environment and infrastructure requests across development, QA, and production.

Technologies Used: Jira, BitBucket, NetSuite, Oracle HCM, Excel Reporting

Job Responsibilities:

- Owned planning, milestones, client communication, and governance for Developer Portal and PCF migration initiatives.
 - Led cross-functional teams and managed resource readiness across engineering and delivery stakeholders.
 - Managed delivery risks, budgets, quality standards, escalations, and direct margin above 45% for the account.
 - Aligned teams, clients, and vendors on delivery goals, dependencies, and improvement practices.
-

5. Account: The Children's Place

Duration: 7 months | **Team Size:** 12 | **Client:** The Children's Place

Description: Development and QA delivery for The Children's Place mobile and web retail applications.

Technologies Used: Jira, BitBucket, NetSuite, Oracle HCM, Excel Reporting

Job Responsibilities:

- Managed resourcing across two projects in fixed-capacity and staff-augmentation models.
 - Owned project scheduling, delivery tracking, and coordination with stakeholders.
 - Led resource planning, performance management, hiring, and interview coordination.
-

6. Account: Ciena

Duration: 1 year | **Team Size:** 15 | **Client:** Ciena Clients

Description: Projects supporting multiple Blue Planet application components.

Technologies Used: Jira, NetSuite, Oracle HCM, Excel Reporting

Job Responsibilities:

- Managed delivery across four functional teams.
 - Facilitated Scrum ceremonies, demos, retrospectives, grooming, and backlog management.
 - Oversaw development, testing, release planning, deployment, and post-production support.
 - Established interface governance for prioritization, risk, issues, and expectations.
 - Owned scheduling, delivery tracking, and stakeholder coordination.
 - Managed resource planning, reviews, hiring, and interviews.
-

7. Account: Ciena Blue Planet Enterprise Automation Suite (BPE)

Duration: 1 year | **Team Size:** 64 | **Client:** Ciena Clients

Description: Enterprise telecom automation suite for network visibility, configuration, change management, and Intelligent NetOps.

Technologies Used: Ansible Playbooks, AWS, Spring Boot, Microservices, BlackDuck, Rapid7, Sonar

Job Responsibilities:

- Managed 8 cross-functional feature teams comprising 60+ Scala, Java, Ansible, DevOps, and QA engineers.
 - Owned software components, vendor tools, SDLC compliance, and maintainability.
 - Managed budgets, KPIs, PMO reporting, resource forecasts, and project finance.
 - Collaborated with product managers and operations users to deliver solutions.
-

-
- Led client governance and stakeholder coordination.
 - Managed performance reviews, resourcing, and vendor coordination.
 - Aligned product, engineering, operations, and vendor teams.
-

Citicorp Technology Services

8. Project: Global Concentration Engine (Liquidity Management Services)

Duration: 6.5 years | **Team Size:** 20 | **Client:** Fortune 500 companies

Description: Liquidity platform enabling global corporate clients to move funds across countries and optimize excess cash through target balancing.

Technologies Used: Java, Web Services, WebSphere, OpenShift/ECS, Shell, Jython, UrbanCode Deploy, BitBucket, Jenkins, Jasper Reports, Spring Batch, Oracle

VA Tools: Black Duck, Checkmarx, SonarQube, Prevoty, Contrast, AVA, IVA

Job Responsibilities:

- Led and coached software engineering teams across employees and vendors.
 - Led enterprise projects covering scope, value, ROI, risks, benefits, and delivery strategy.
 - Led security, compliance, code quality, and vulnerability remediation initiatives.
 - Guided teams through SDLC, technical resourcing, and Agile delivery.
 - Drove enterprise customer onboarding across EMEA, APAC, and NAM regions.
 - Coordinated operations, development, and testing teams to resolve defects and operational issues across sprint releases.
 - Automated CI/CD pipelines and supported WebSphere-to-ECS modernization.
-

Opus Software Solutions

Role: Development Lead | **Duration:** June 2008 – June 2011 | **Client:** Western Union

- Led development delivery for Western Union client initiatives.
-

SunGard Technology Solutions

Role: Software Engineer | **Duration:** June 2006 – June 2008 | **Client:** British Petroleum

- Contributed to the development of energy products for SunGard clients, including British Petroleum.
-

CERTIFICATIONS

- **Project Management Professional (PMP)**
- Google Cloud Digital Leader (GCP-CDL)
- SAFe 5.1 Product Owner/Product Manager, Scrum Master (SSM), and SAFe 5.1 Agilist (SA)
- Certified Scrum Product Owner (CSPO) and Certified Scrum Master (CSM)
- ICAgile Certified Agile Coach
- Kanban Management Professional
- PRINCE2 Practitioner Certification
- ITIL Version 3 Foundation - IT Service Management
- Sun Certified Programmer for Java Platform (SCJP), Standard Edition 5.0

AI / GEN AI EXPOSURE

- Applied GenAI to accelerate code understanding, documentation, analysis, backlog refinement, and delivery planning.
- Used AI-assisted approaches for code review support, solution brainstorming, governance reporting, and team enablement.
- Supported responsible AI adoption through productivity-focused, governance-aware enterprise delivery use cases.

KEY ACHIEVEMENTS / HIGHLIGHTS

- Managed multi-account delivery across healthcare, HCM, retail, telecom, and BFSI, improving predictability and client satisfaction.
- Led distributed engineering teams across India, Romania, and the U.S., supporting collaboration, talent development, and delivery execution.
- Drove Agile, DevSecOps, cloud modernization, CI/CD automation, governance, planning, resourcing, risk tracking, budgets, and reporting across enterprise programs.

EDUCATION

- PGDBA-DLP in e-Business – Welingkar, Mumbai University (2009)
- Master of Engineering (ME) in CSE-IT – VIT, Pune University (2006)
- Bachelor of Engineering (BE) in Computer – AVCOE, Pune University (2004)

AWARDS / RECOGNITION

- Brilliant of the Quarter awarded twice for exceptional project delivery at Brillio.
- Received the Quarterly Gold Award at Citicorp for implementing a one-click deployment solution, reducing deployment time by 25%.
- Recognized as Employee of the Month twice at Synechron for high-impact project execution.
- Ranked in the top 4% nationwide in GATE 2004 with an All India Rank of 321.

PATENT

- System and Method for Data Sharing and Group Messaging using Mobile Phone — Patent #: 225380 / 984/MUM/2004 for India; PCT Application: PCT/IN2005/000310.
