

Sumeet Satish Boob | PMP®

Program & Portfolio Management | Enterprise Transformation | AI Enabler

EXECUTIVE PROFILE

Senior Program & Portfolio Manager with 20 years of experience delivering large-scale technology transformation, global engineering leadership, and enterprise program execution across Banking (Treasury, Liquidity, Cash Management), Healthcare & Life Sciences, Retail, and Telecom. Proven track record of managing multi-million-dollar portfolios, building high-performing global teams, driving operational excellence, and delivering complex digital transformation programs for Fortune 500 clients. Leveraging AI-assisted delivery, engineering productivity, and modern operating models to accelerate business outcomes, delivery excellence, & organizational transformation.

EXECUTIVE SNAPSHOT

- 20 Years of Enterprise Technology Leadership
- \$12M+ Portfolio Delivery
- 60+ Global Engineering Professionals Led
- Global Delivery across India, US & Europe
- 20+ Enterprise Program & Product Releases
- Executive Stakeholder Management | SteerCo & ExCo Governance
- Treasury, Liquidity & Trade Finance Platform Delivery
- Regulated Banking Platform Modernization & DevSecOps Governance
- PMP | PRINCE2 | SAFe | Google Cloud Digital Leader
- AI-enabled Delivery | Platform Modernization | Engineering Productivity

BUSINESS IMPACT

- Directed \$12M+ cross-regional portfolios across BFSI, healthcare, life science, and retail domains with full delivery ownership and executive stakeholder engagement.
- Reduced client escalations by 50% through strengthened governance frameworks, delivery oversight, and operational controls.
- Led AI-enabled modernization and DevSecOps transformation initiatives improving engineering productivity, deployment reliability, and delivery efficiency for Treasury and Trade platform delivery.
- Automated enterprise deployment workflows reducing build and deployment effort by 32% across Citi Treasury and Trade operations for Liquidity Management Services.
- Scaled cross-regional engineering teams across India, Romania and the US, improving delivery predictability and operational efficiency.

EXECUTIVE EXPERTISE

Enterprise Leadership

- Portfolio & Program Management
- Enterprise Transformation
- Global Delivery Leadership
- Executive Stakeholder Management
- P&L Ownership & Financial Governance

Transformation & AI

- Digital Transformation
- AI-assisted Delivery
- Agile / SAFe Delivery
- Engineering Productivity & Automation
- Organizational Transformation

Governance & Delivery Excellence

- Risk & Compliance Management
- Delivery Governance
- Operational Excellence
- Quality & Process Excellence
- Release Management

Technology Strategy

- Cloud & Modern Engineering
- DevSecOps & CI/CD
- Cloud & Platform Modernization
- Engineering Productivity & Automation
- Data & AI Platforms (Exposure)

Brillio Technologies

Senior Software Development Manager | Sep 2021 – Present

- Owned end-to-end delivery and transformation of strategic healthcare and retail programs, leading global engineering teams while driving modernization, operational excellence, executive governance, and portfolio growth.
- Leading the Sun Pharma Brand Sites account across AEM and React platforms, establishing delivery governance, operating processes, intake controls, and execution frameworks from the ground up while coordinating across multiple brand agencies, vendors, and Sun Pharma stakeholders.
- Set up core project processes including demand intake, estimation governance, sprint planning, dependency tracking, RAID management, status reporting, and stakeholder review mechanisms to bring structure, predictability, and transparency across brand-site delivery.
- Established delivery operating rhythm across agency, vendor, and client teams through weekly governance forums, action-item tracking, escalation paths, release readiness checks, and UAT coordination for AEM Cloud, React.js, and Next.js implementations.
- Drove public website engineering practices for enterprise brand sites, focusing on scalable front-end architecture, CMS-led content operations, performance, accessibility, SEO readiness, uptime, and controlled release governance.
- Partnered with executive client stakeholders to shape transformation roadmaps, delivery strategy, and multi-year technology investment priorities.
- Drove AI-assisted engineering productivity initiatives using GitHub Copilot and automation accelerators.
- Expanded strategic accounts through delivery excellence, executive relationship management, and identification of transformation opportunities.
- Directed 60+ FTE global engineering organization delivering \$3M+ portfolio (yearly) with full P&L accountability.
- Strengthened executive governance cadence across client leadership, reducing escalations by 20%.
- Delivered enterprise modernization initiatives across healthcare and retail platforms including CareMetx, Dayforce Tax Automation, and Albertsons Developer Portal.

Accounts: Sun Pharma | CareMetx | Dayforce | Albertsons | Ciena Blue Planet

Citicorp Technology Services

AVP, Technology & DevOps Manager | May 2015 – Sep 2021

- Established globally distributed engineering and DevOps operations across 4 delivery tracks with 18-member cross-functional teams spanning development, DevOps, and NPS functions.
- Transformed Enterprise Liquidity and Treasury platform delivery across Java, WebSphere, and SQL-based ecosystems supporting global banking operations.

CERTIFICATIONS

- Project Management Professional (PMP®)
- Google Cloud Digital Leader (GCP-CDL)
- SAFe Certified Product Owner
- SAFe Certified Scrum Master
- PRINCE2 Practitioner

EDUCATION

- PGDBA in e-Business, Welingkar, Mumbai University
- Master of Engineering in Computer Science, VIT, Pune University
- Bachelor of Engineering, Pune University

PATENT

- Title: "System and Method for Data Sharing and Group Messaging using Mobile Phone"
- Patent #: 225380
984/MUM/2004 for India.

RECOGNITION

- Awarded "Employee of the Quarter" twice for exceptional project delivery in **Brillio**.
- Received Quarterly Gold Award at **Citicorp** for implementing a one-click deployment solution, reducing deployment time by 25%.
- Recognized as Employee of the Month twice at **Synechron** for high-impact project execution.
- Top 4% nationwide in GATE-2004 with All India Rank of 321.

- Standardized DevSecOps governance and compliance initiatives including Blackduck, Checkmarx, Sonar, Contrast, and observability-driven operational controls.
- Delivered mission-critical banking applications supporting corporate treasury operations with stringent availability, audit, and regulatory compliance requirements.
- Accelerated end-to-end deployment automation initiatives across lower environments through pre-production, improving release efficiency and reducing operational risk.
- Directed modernization initiatives enabling migration from legacy architecture to microservices-based platforms.
- Partnered with global stakeholders to strengthen governance cadence, deployment reliability, platform stability, and compliance adherence.
- Oversaw security remediation and release governance activities ensuring enterprise compliance standards and audit readiness.
- Received Quarterly Gold Award for implementing one-click deployment automation improving deployment efficiency by 25%.

Synechron Technologies

Technology Lead | May 2011 – Apr 2015

- Led managed services delivery for 32 enterprise insurance clients across globally distributed engagement models.
- Managed 2 Agile delivery pods comprising developers and QA engineers, overseeing end-to-end software development lifecycle execution.
- Acted as Scrum Master and Delivery Lead driving sprint governance, stakeholder communication, and delivery planning.
- Delivered modernization initiatives involving migration from legacy platforms to Spring Boot-based microservices architecture.
- Contributed to solutioning and technical design for enterprise modernization programs across Java-based ecosystems.
- Collaborated directly with client stakeholders with complete ownership of delivery coordination and execution.
- Worked onsite for client engagements, strengthening customer collaboration and delivery alignment.
- Delivered enterprise implementations across organizations including Home Depot, IBM, Lenovo, and **Asurion**.

Opus Software Solutions

Development Lead | June 2008 – June 2011

- Clients worked for: Western Union

SunGard Technology Solutions

Software Engineer | June 2006 – June 2008

- Development on Energy products for SunGard clients like British Petroleum.
-

AI Innovation & Adoption

TECHNOLOGY ECOSYSTEM

AI Development & Productivity

- GitHub Copilot
- Codex
- Claude
- Cursor
- Antigravity
- Ollama

DevSecOps & Governance

- Jenkins
- Blackduck
- Checkmarx
- Sonar
- Contrast
- AppDynamics

Engineering Platforms

- Java
- Spring Boot
- WebSphere
- AWS
- SQL
- AEM Cloud
- React.js
- Next.js
- Public Website Engineering

Delivery & Collaboration

- Jira
- NetSuite
- MS Project

Database & Middleware

- SQL Server
- PL/SQL

- Built AI-assisted delivery accelerators for project management, documentation, engineering productivity, and rapid application delivery.
- Building Agentic AI solutions to automate delivery governance, engineering productivity, executive reporting, portfolio insights, and SDLC operations.
- Developed AI-enabled web solutions demonstrating modern software engineering practices and rapid prototyping.
